

PERMALOK

A Northwest Pipe Company

BECAUSE PRECISION MATTERS

Permalok® produces to the tightest tolerances and highest quality in the industry. With over 4 million linear feet of pipe currently in service, Permalok® is approved by many DOT's in North America as well as AREMA. Only Permalok® is capable of meeting or exceeding all common specifications including ASTM A-1097 with mechanical press-fit connections.

You ask, we listen...Introducing the new Permalok® AB Joint*

The latest innovation in steel pipe, the patent pending Permalok® Auger Bore Joint.

Never satisfied with the status quo, Permalok® has worked diligently to incorporate our customer feedback from the toughest jobs to develop and provide new solutions to you to increase your productivity and minimize your risks. With a proven track record of over 30 years helping our customers succeed on the most difficult projects, Permalok® is pleased to introduce the newest innovation in Steel Pipe.

Be it guided auger bore, pilot tube, rock, sand, clay or water Permalok® has the right tool for you to make your customer's expectations, in the most difficult situations a reality.

The development of the AB Joint* has allowed us to not only provide for a simpler direct jack installation of pipes containing auger flighting; but has simultaneously reduced the jacking forces required to make a connection while maintaining the same demanding properties needed on steel casing pipe and low to no-pressure systems such as culverts and run-off sewers.

The AB Joint* makes no sacrifices in the integrity or performance of the pipe, allowing faster installation for contractors by removing the need to weld steel pipe.

Keep your customers happy with faster project completion and fewer service interruptions.
