## PERMALOK AB JOINT

### THE AUGER BORE JOINT

Incorporating customer feedback from the toughest jobs, the latest innovation from Permalok® is the patent-pending Auger Bore Joint. This steel pipe innovation provides a new solution to increase productivity in the field while minimizing risks on tough to access trenchless pipeline projects.

The Permalok® Auger Bore press-fit joint was developed specifically to shorten field installation time without sacrificing quality or durability. The interlocking push joint eliminates the need to field butt-weld casing pipe simply by jacking the pipe pieces together. The result is substantial overall project cost savings.

With a proven track record of over 30 years, Permalok® manufactures steel pipe to the tightest tolerances and quality in the industry. The new Auger Bore Joint is no exception. With over 4,000,000 linear feet of pipe currently in service, Permalok® is approved by many DOT's in North America as well as AREMA. Only Permalok® is capable of meeting or exceeding all common specifications including ASTM A-1097 with mechanical press-fit connections.

#### Client-Driven Innovation

The latest innovation in steel pipe, is the patent-pending Permalok® Auger Bore Joint. With a proven track record of over 30 years, Permalok continues to develop products that support the growing needs of our clients.

Direct push engagement for auger flying
