We offer a work environment that values safety and team input, and provides opportunities to gain skills and grow your career.

### ABOUT THE JOB

Position, rework, fit and weld according to written and typed instructions, blueprints, manufacturer's specifications and knowledge of characteristics of metal. Select equipment and plan layout, fabrication, assembly and welding.

### ESSENTIAL FUNCTIONS & MAJOR RESPONSIBILITIES

- Layout, position, align and fit components together using applicable machines, tools and equipment.
- Bolt, clamp and tack-weld parts to secure them in position for final welding,
- Set up and weld parts using welding equipment.
- Maintain sufficient knowledge of geometry, arithmetic, structural design, heat effects and allowances for thickness of metal to project location of holes, cuts and bends from blueprints, written and typed instructions and manufacturer's specifications.
- Use hand tools and be able to correctly setup and operate applicable shop machines.
- Perform arc and oxy-acetylene welding, cutting and brazing on various ferrous and nonferrous metals, in accordance with established methods and procedures.
- Maintain production documentation per required procedure.
- Perform other work related tasks as assigned.
- Comply with all Northwest Pipe Company WTG and HSE policies and procedures.

- Test weld seams for leaks.
- Operates and controls the water pressure.
- Roll cylinder on to hydro.
- Records (accurately) the cylinder numbers, and special information.

Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.
