

## PROJECT MANAGER

### IMMEDIATE OPENING – Saginaw, TX

We are looking for an energetic Project Manager with full cycle project experience in the construction field, with an engineering background and skilled with drawings in AUTOCAD.

Northwest Pipe (NASDAQ: NWPX), is the largest manufacturer of engineered steel pipe water systems in North America. We utilize both the spiral and rolled weld and welded methods of manufacturing for our large diameter double-submerged arc welded pipe. The Water Transmission Group serves a wide range of markets and their solution-based products are a good fit for applications including: water transmission, plant piping, low pressure and gravity flow, energy, tunnels, river, railroad and highway crossings, large diameter pressure pipe rehabilitation, structural, and industrial

As a Project Manager

- ✓ You are responsible for all stages of the job from the initiation of the contract to job closes-out. Supporting Engineering, Plant Manager, Senior Production Manager and Operations Manager and reviews all jobs assigned to the engineering department.
- ✓ A significant function is to provide proactive leadership between internal customers and the technical staff to ensure effective manufacturing methods.
- ✓ Manage multiple, parallel projects using formal project planning techniques
- ✓ Deliver all projects in a timely and efficient manner is mandatory.
- ✓ Ensure that the contractual obligations of the organization are met within the parameters of the job budget and minimize the organization's liability.
- ✓ Establish a long-term rapport with customers while keeping the best interests of Northwest Pipe Company in mind.
- ✓ Strong business analyst, application design, and project management skills are essential.

#### **EDUCATION/EXPERIENCE:**

- Bachelor's Degree in Engineering; or 5-7 years of related experience in an Engineering Discipline, Construction or Industrial Management experience; or equivalent combination of education and experience.
- 5 -7 years of Pipe or Steel experience, preferably in Water Transmission Sector with a Pipe Manufacturer.
- Minimum 8 years in a project management role in a complex business and systems environment.
- Computer Assisted Design experience.
